INSTANT HOT-PEEL TRANSFER POLYESTER FOR SILKSCREEN PRINTING

HCS100/2-HPv3, is a double side coated instant hot-peel transfer film with excellent dimensional stability and matt finish. HCS100/2-HPv3 is suitable for plastisol, water-based and PU inks. The film is thermo-stabilized and antistatic. Due to the special coating the transfer can be released directly after opening the heat press.

PROPERTIES

Product reference	HCS100/2-HPv3
Carrier	100 micron polyester
Stability	Thermo stabilised with anti-static treatment
Coating	Release coating on both sides
Compatible inks	Plastisol, *water-based and PU inks
Printing side	Both sides
Ink release	Light/medium peel force
Peel	Instant hot-peel
Advantages	Highly stable: because of anti-static and thermo stability treatment Double matt: No slipping problems in automatic silkscreen machines nor material loss because of mixing up the printing side Easy transfer positioning: because of semi-transparency of the polyester Fast processing: Instant hot-peel which results in great productivity
Packaging	Sheets – 50 x 70 cm (other sizes and rolls on request) 200 sheets per packaging
Storage	In dry environment at room temperature Recommended processing-time: 6 months after delivery
