

PREP THE WALL

PREPARATION: PRIMING & SEALING

There are three categories of substrates: new, painted or decorated. Analyzing the current condition of a substrate and properly preparing is key for a successful wallcovering application. Using an appropriate primer or sealer not only promotes adhesion and strippability, it also guarantees lower consumption and better coverage of the adhesive.

The following products can be used to pre-condition the substrate.

FLEXXS PRIMER

Interior use only on porous substrates
Touch dry after 1 hour
Ready to hang wallcovering after 4 hours

- Ready-to-use
- Deep penetrating
- Reduces absorbency
- Binds and strengthens
- Easy to apply
- Enhancing adhesion
- Free from solvents
- Low odor

A solvent free deep penetrating, modified synthetic resin based water dispersion primer. Intended for interior use only, as a pre-wallcovering basecoat and is specially formulated to properly prepare slightly chalky and absorbent surfaces like concrete, cement, dryboard, plaster, previously painted walls and wood. Flexxs Primer creates a solid and evenly absorbent surface thus enhancing adhesion of paint or wallcovering.

Article number: FLEXXS-PRIMER/5L
Price in EUR: € 30.42

FLEXXS PRIMER PLUS

Interior use only on porous substrates
Touch dry after 1 hour
Ready to hang wallcovering after 4 hours

- Ready-to-use
- Water resistant
- Fast drying
- Reduces absorbency
- Easy to apply
- Enhancing adhesion
- Free from solvents
- Low odor

A solvent free, white pigmented, water-based copolymer dispersion primer. For providing a perfect water resistant basecoat for subsequent wallcovering basecoat and is specially formulated to properly prepare slightly chalky and absorbent surfaces like concrete, cement, dryboard, plaster, previously painted walls and wood. Flexxs Primer Plus creates a solid and evenly absorbent surface thus enhancing adhesion of paint or wallcovering.

Article number: FLEXXS-PRIMER-PLUS/5L
Price in EUR: € 64.35

FLEXXS SEALER

For all projects - Interior & Exterior
Touch dry after 30 minutes
Ready to hang wallcovering after 1 hour
Fully cured after 7 days

- Ready-to-use
- Reduces porosity
- Improves adhesion
- Bonds without sanding
- Binds chalky surfaces
- Promotes strippability
- Super fast dry
- Low odor

An all-purpose premium quality, water-based white pigmented wallcovering primer & sealer with excellent alkali resisting and stain blocking properties. Formulated to properly prepare almost any surface with an ideal water resistant base-coat for any decorating project. This multi-surface product guaranteed perfect adhesion and promotes stripability when removing wallcovering.

Article number: FLEXXS-SEALER/2.5L
Price in EUR: € 82.50

PASTE THE WALL

APPLICATION: ADHESIVES

Specialty wallcoverings like MuroSubli® requires the use of a heavy duty, premixed commercial grade vinyl adhesive with added mold growth inhibitor such as Flexxs Medium and Flexxs High.

Compared to other brands the adhesives provide great wet tack (strength) and also better adhesion for all types of wallcovering. It is an easily spreading, high yielding paste and therefore economical in use.

FLEXXS MEDIUM

For install onto porous surfaces such as drywall, wood, concrete, plaster and high quality latex painted walls.

- Ready-to-use
 - Spreads easily
 - Repositionable
 - Long open-time
 - Solvent free
 - Lump free
- High-Tack ready-to-use adhesive for hanging any printed wallcovering fast and easy. A water dispersed adhesive paste, based on starch reinforced with vinyl acetate polymer. Formulated for strippability on primed or sealed surfaces. With a very high initial tack and final bonding strength combined with excellent adjustability for accurate positioning.

Article number: FLEXXS-MEDIUM/05KG

Price in EUR: € 28.16

Article number: FLEXXS-MEDIUM/10KG

Price in EUR: € 42.13

FLEXXS HIGH

Intended for use on permanently sealed, non-porous substrates such as vinyl, glass, formica and plastics.

- Ready-to-use
 - Spreads easily
 - Repositionable
 - Lump free
 - Solvent free
 - Extra long open-time
- High solids and low moisture, ready-to-use adhesive with an extra high tack designed for printed wallcovering and all other types of textile and vinyl wallcovering over non-porous and difficult to hang surfaces where extreme adhesion is required. A polymer-based adhesive providing high performance in wallcovering bonding.

Article number: FLEXXS-HIGH/05KG

Price in EUR: € 45.65

FLEXXS WALL FINISH

Developed to be applied seamless as a clear protective finish to digitally printed wallcovering

- Dirt repellent
 - UV resistant
 - Color stable
 - Low odour
 - Solvent free
 - Decontaminable
- A milky white, waterborne single component, acrylic surface coating, containing a combination of encapsulated in-film preservative and silver ions. The anti-microbial silver ion additives ensures long-term bacterial resistance. The coatings thickness provides durability, making surfaces resilient to decontamination and repeated cleaning regimes.
